PREFACE.

IN the preparation of this volume my purpose has been to provide a Reference Book of Dates for Worcester events, which would readily afford often desired information as to the exact time of any noteworthy local occurrence. With this end in view, a large number of items have been gathered, including not only the more important matters which are familiar in print, but also many of a kind not usually noticed in town histories. Among the latter may be mentioned the visits of literary, theatrical and musical celebrities ; political conventions, meetings and disturbances ; exhibitions, fairs, lectures and entertainments ; riots, accidents and calamities ; natural phenomena ; and many things uncommon and singular. Notes, explanatory, historical, biographical or anecdotal, have been added ; and a complete index will be found at the end.

In the compilation of the matter I have drawn freely from the many printed works relating to the history of Worcester, both general and special ; from the files of the Worcester papers, (which I have been kindly allowed to consult at my convenience at the library of the American Antiquarian Society) ; from the publications of The Worcester Society of Antiquity, which have supplied many original items ; and from other sources too numerous to mention. I am also indebted to many persons for facts and statements included in the book, some of which appear in print for the first time.

I have endeavored to make the statements as to time, correct ; but where so much miscellaneous matter has been brought together, it would be unreasonable to assume that no errors will be found. The displayed dates have been carefully verified by the best authorities, and, as a whole, I think they can be relied upon. The list is by no means complete : a second gleaning—which I leave to some zealous antiquary of the future—would disclose many facts not noticed in this collection.

It was expected that a large number of delegates to the Whig Convention at Baltimore would pass through town that afternoon; and accordingly certain prominent men of the Harrison party made preparation to give them a welcome, after the established form in which Harrisonism now exhibits its hospitality. They took a barrel of *hard cider*, highly charged, it is said, with *brandy*, and mounted it conspicuously in the Depot building of the Boston & Worcester Railroad. A pole was stuck into the bung-hole, across the top of which was a signboard bearing the conspicuous inscription—'HARD CIDER; *Help Yourselves.*' And underneath was hung a miserable mockery of our national flag—a Harrison pocket handkerchief. Hard crackers and cheese flanked the sides of the barrel, and a noisy dandy negro officiated as master of ceremonies. The cars having been delayed on the road two hours beyond their time, and the cider having circulated freely in the meantime, among the devotees, old and young, of the 'hard cider candidate,' the 'Harrison enthusiasm' had got to so high a pitch when the cars came in that it burst forth as though Pandemonium had let loose its masses. Prominent Whigs were screaming 'hard cider' at the top of their voices; pails of it were thrust into the cars, along with broken cheese and baskets of crackers, where it was caught up by Whig dandies in kid gloves, with as much apparent delight as the caged beasts in a menagerie seize their daily allowance of refuse meat."—*Worcester Palladium*, Wednesday, May 6, 1840.

The concussion was very severe; the door of the office was broken to fragments, and a piece of the shell went through the brick wall in the rear, while the building was considerably shattered. This outrage was one result of the temperance agitation, in which Mayor Chapin had taken a prominent part; and the principal in the affair was Jubal Harrington, quondam Postmaster, and editor of the *Republican*, who had promised to give the Free Soilers and Temperance

Agitators "hell and scissors." Harrington forfeited his bonds and fled to California, where he became a judge and a man of consequence.

With this object in view, I travelled thousands of miles, by night and by day, in midwinter and midsummer, speaking three, four, and five times a week, in feeble health, and under a heavy burden of domestic care and sorrow, and inculcating the priceless value of the Union in precisely the same terms from Maine to Georgia and from New York to St. Louis."—*Public Speech of Mr. Everett*.

Finally, the City Guards were ordered out, and the rioters dispersed.

311 1791. "Saturday night last, Stephen Burroughs, Stephen Cook, Stephen Cook, Jun. and Simon Wetherbee, who were confined in the gaol in this town, effected their escape by sawing a passage for themselves through the grates. . . . One hour in the pillory, thirty stripes, and about seven weeks imprisonment were yet due to Burroughs."—*Spy, Thursday, June 2, 1791.*

Burroughs had, for immoralities committed, as was alleged, in Charlton where he was teaching school, been sentenced to receive one hundred and seventeen stripes on the naked back; to stand two hours in the pillory; to sit one hour on the gallows with a rope around his neck; to remain confined in prison three months; and procure bonds for his good behavior for seven years. His conviction appears to have been unwarranted by the evidence, which was questionable and slender, while the sentence imposed by the judges, whose minds were evidently biased by the former reputation of the prisoner, was unreasonably severe and out of proportion to the offence. There is some evidence to show that the public sympathy in his behalf, openly expressed, was finally manifested in a practical manner. In the published memoirs of Burroughs, the statement is made "that many people in the vicinity were of opinion that he was too severely punished, among whom were some of the first characters in the county. Burroughs was aware of this, and cherished secret hopes of deliverance. One night about 12 o'clock, he says

his prison door was forced open, and he was requested to depart. He walked out, and passed between two ranks of people to a great distance; the number appearing to him not less than a thousand. All this time there was a profound silence; and he departed, ignorant of the names of his deliverers."

469 1806. Robbery of the *Ægis* Office.

"In December, 1805, the whole [*Ægis*] property was attached under a claim growing out of debts of the printer, Samuel Cotting, and the publication suspended. The democratic citizens, roused to exertions, procured new apparatus, which they vested in trustees, and the *Ægis* again appeared, Feb. 19, 1806, in deplorable dishabille for a time, but soon regained neatness and beauty. A new calamity occurred to interrupt its prosperity. On Sunday, the 6th of July, during the hours of worship, a part of the types were removed, and the sheets, impressed on one side, carried away by Cotting, who, on the next Wednesday, in his individual capacity, sent out the paper in handsome form, while the trustees of the subscription fund were scarcely able to communicate their misfortune. A curious state followed, realizing the confusion of external identity, imagined in the Comedy of Errors. Two papers were published in the same town, on the same day, claiming to be 'the true *Ægis*.' A contest painful to retrace ensued, disturbing the repose of the village, proceeding almost from words to blows in private discussion, and furnishing subjects for judicial investigation. The good sense of the community, for a time amused by the the bitter feeling of the combatants, and the personal insult degrading pages which should have been devoted to common improvement, at length acted on the source of the commotion, and after a few months of infamous existence, the false print disappeared."—*Lincoln's History*.

An ecclesiastical fire was, and for years had been, raging in the Old South Church, which set the whole town in a blaze. Mr. Waldo seceded from the Old South Society, and built, at his own expense, a new meeting house, which was completed in 1823, and has been successively called the *Calvinist Church*, the *Central Church*, and often at first, the *Waldo Church*. Gen. Nathan Heard and Hon. John Davis retained their membership in the Old South Church, and were both decided friends of its pastor, Rev. Charles A. Goodrich, a college classmate of Mr. Davis, but the special object of Mr. Waldo's dislike and hostile measures. It so happened, that, without any purpose of involving or affecting ecclesiastical matters, Mr. Heard and Mr. Davis were proposed as members of the old *Fire Club*, and on balloting for their admission, each was *blackd* by the single ballot of Mr. Waldo; and

innovation in singing.

"Anciently, those who joined in singing the devotional poetry of religious exercises, were dispersed through the congregation. . . . After the clergyman had read the whole psalm, he repeated the first line, which was sung by those who were able to aid in the pious melody: the eldest deacon then pronounced the next line, which was sung in a similar manner, and the exercises of singing and reading went on alternately. . . . By resolution of the town, Aug. 5, 1779, [it was] 'voted, that the mode of singing in the congregation here, be without reading the psalms, line by line, to be sung.'

"The sabbath succeeding, . . . after the hymn had been read by the minister, the aged and venerable Deacon Chamberlain, unwilling to desert the custom of his fathers, rose and read the first line according to his usual practice. The singers, prepared to carry the alteration into effect, proceeded, without pausing at its conclusion: the white-haired officer of the church, with the full power of his voice, read on, until the louder notes of the collected body overpowered the attempt to resist improvement, and the deacon, deeply mortified at the triumph of musical reformation, seized his hat, and retired from the meeting house in tears."—*Lincoln's History*.
